Melbourne

I am a software engineer passionate about building the right thing, and building it right.

Things I care about:

- Organisational and team culture (in particular, safety to explore and, on occasion, get things wrong)
- Autonomy of the team and individual
- CI/CD
- Monitoring and observability
- Evolutionary design over upfront design

EXPERIENCE

Senior Consultant - Software Developer

Thoughtworks · Sept 2022 - August 2023

- Developed composable, reusable features in a pipeline-as-a-service product for internal teams
 - Led a team of 4 developers to successful delivery of a critical feature (deployment to a pre-prod environment in a pipeline-as-a-service product)
- Influenced engineering culture beyond my own team through:
 - Presenting brown bags
 - Driving discussions with architecture group

Consultant - Software Developer

Thoughtworks · June 2021 - Sept 2022

- Drove towards high quality software outcomes
 - Uplifted engineering practices including testing in a product that had many corners cut
 - Enabled better testing practices by implementing ephemeral test environments
- Influenced team culture and ways of working towards agile/XP practices
- Built and maintained strong relationships with key stakeholders in a challenging consulting environment
- Mentored/coached less experienced developers

Software Engineer

Xero · November 2019 - June 2021

- Mentored/coached graduate and junior developers
- Advocated for better development practices and standards
- Led initiatives focused on uplifting the quality of engineering within my team
- Constantly pursued improvement in problematic codebases

Software Developer

Acurus Pty. Ltd. · May 2017 - November 2019

Software Developer

Quantum IT · November 2016 - May 2017
